

Precision. Quality. Reliability.

ENGINE VALVES

Reliable Engineering House

Mumbai, INDIA

reliableengg.com

WHY CHOOSE US?

Reliable Engineering House has been a notable name in the replacement parts market, supplying high quality Engine Valves for over four decades. Our proficiency lies in meeting the demands of international markets, having successfully exported our products to over 40 countries.

Our commitment to excellence is reflected in the stringent Quality Control Measures implemented at every stage of production. This ensures that the Engine Valves we offer meet the highest standards of Quality and Reliability.

Recognizing the pivotal role Engine Valves play in the operation of internal combustion engines, controlling the precise flow of air, fuel, and exhaust gases, we ensure our valves are produced using high quality steel, which can be either Magnetic, Non-Magnetic, or Bi-Metallic as per the specific engine design.

With a comprehensive range, we provide Engine Valves for over 3000 models, spanning Automotive, Agricultural, Industrial, and Marine Engines. Whether for Cars, Buses, Trucks, Tractors, Heavy Duty Vehicles, or Agricultural Engines, our products consistently meet the stringent requirements of diverse applications.

The **Inlet Valve** is usually made of a magnetic material. The **Exhaust Valve** may be made using a magnetic or a non-magnetic material. Some Exhaust Valves may be produced using a Bi-Metallic material. This is achieved by a friction welding process.

SEAT HARDENING

The seat area of an inlet valve is often hardened to enhance durability and resistance to wear. The seat is hardened by an Induction Hardening process.

SEAT HARD FACING

The seat face of the Valve may often be coated with special alloys, usually Stellite or similar alloys. The coating is applied manually by fusion welding using Oxy-Acetylene Flame or Plasma Transferred Arc (PTA) methods.

MANUFACTURING PROCESS

The manufacturing of Engine Valves involves a meticulous process that combines metallurgy, precision engineering and stringent quality control. The manufacturing process of these valves typically includes several key stages such as forging, rough machining, rough grinding, grooving, final machining and final grinding.

QUALITY CONTROL

Reliable Engineering House is dedicated to establishing itself as a premier supplier of replacement engine parts, with an unwavering commitment to the highest standards of quality. In our relentless pursuit of customer satisfaction and to align with the rigorous standards of the automotive aftermarket, Reliable Engineering House proudly holds ISO 9001:2015 certification. This certification reflects our dedication to enhancing our processes to better cater to the evolving needs of our valued customers.

Our quality control system is designed to surpass the most stringent requirements, emphasizing our commitment to delivering excellence to our customers. At our state-of-the-art Quality Control Lab, we boast cutting-edge inspection and testing equipment overseen by a team of experienced professionals. We continually invest in the latest inspection instruments, underscoring our focus on driving and maintaining superior quality across our product line.

OUR PROMISE

50+ Years of Experience

Supplying in over 40 Countries

Certified ISO 9001:2015

100% Testing for Zero Rejection
